A common way to create PDF files is through scanned material, which you can save or send to friends, family or professional associates. If you receive a PDF and it is too dark to print or read easily, you may want to use software to lighten it for easier viewing if you don't have access to the original.

Acrobat has no good tools to do this within Acrobat, it's not an image editor. What you need to do is select Tools>Content Editing>Edit Text&Images, then right-click on the image in question and select to "Edit Using..." and then pick an image editor. If you have Photoshop installed, that would probably be the best choice.
