

carpet court tennis tournaments pdf

A carpet court is a type of tennis court. The International Tennis Federation defines carpet courts as a "textile surface of woven or non-woven nylon, or a polymeric or rubber material, typically supplied in rolls or sheets" and as a removable surface. It is one of the fastest court types second only to grass courts.

Category:Carpet court tennis tournaments - Wikipedia

Tennis is played on different court surfaces that vary greatly. There are four main types of tennis court surfaces -- carpet, clay, grass and hard surface. Each type has various characteristics that affect speed and style of play, not to mention cost and upkeep, according to the International Tennis Federation (ITF).

Comparison of Tennis Court Surfaces | Chron.com

Carpet is still used in the ITF pro circuit (lower level professional tournaments), but the ATP and the WTA decided to stop using it for the same reason the hard courts and the grass courts became slower, because a fast court (carpet is the fastest surface) is bad for the spectator, you see faster points and most of the points are won with ...
