Parent Management Training (PMT) - University of Washington

By the time your child is about 4 years old, he will have established his own preferences and habits related to food. Creating a healthy eating environment, both at home and in child care, for your infant or toddler is the best way to help him develop healthy eating habits that will likely last into adulthood.

Helping Your Child with Autism Thrive Parenting Tips, Treatments, and Services That Can Help. There are many things parents can do to help children with Autism Spectrum Disorder (ASD) overcome their challenges.

Helping Your Child with Autism Thrive: Parenting Tips

Talk to Your Child's Doctor. As a parent, you know your child best. If your child is not meeting the milestones for his or her age, or if you think there could be a problem with the way your child plays, learns, speaks, acts, and moves talk to your child's doctor and share your concerns.

Concerned About Your Child's Development? | CDC

Autism is a developmental disorder characterized by troubles with social interaction and communication, and by restricted and repetitive behavior. Parents usually notice signs during the first two or three years of their child's life. These signs often develop gradually, though some children with autism reach their developmental milestones at a normal pace before worsening.
