The Next Generation Air Transportation System (NextGen) is an ongoing multibillion-dollar modernization of the National Airspace System (NAS). The Federal Aviation Administration (FAA) started working on NextGen improvements in 2007 and plans to have all major components in place by 2025.. The goals of the modernization include using new technologies and procedures to increase the safety ...

### **Next Generation Air Transportation System - Wikipedia**

How NextGen Works. As the steward of America's airspace, the FAA is committed to ensuring that we have the safest, most efficient airspace system possible today and for generations of air travelers to come.

Visual flight rules (VFR) are a set of regulations under which a pilot operates an aircraft in weather conditions generally clear enough to allow the pilot to see where the aircraft is going. Specifically, the weather must be better than basic VFR weather minima, i.e. in visual meteorological conditions (VMC), as specified in the rules of the relevant aviation authority.

### **CIVIL AVIATION REQUIREMENTS**

Near mid-air collisions were a result of congested communications and the lack of airspace situational awareness as peripheral visibility was gained through air traffic control communications. Again, due to the voice channel being busy, pilots in-flight experienced difficulty contacting air traffic control for an update on other aircraft in the ...

### **Choosing the right VHF data link for commercial aviation**

As pilots, air traffic controllers and flight service specialists, we should all know the rules on VFR and SVFR. Why do so many of us misunderstand these concepts? For one thing, some of the rules have changed since we first learned them. Air traffic services (ATS) procedures have been a bit slow to ...

### **Flight Operations - Transport Canada**

Whether you are flying a drone for fun or profit you must legally keep your device within your 'visual line of sight' at all times. The law is based on the clear premise that if you can't see your drone, you can't control your drone.
